

Rugged and Reliable Mobile Broadband Solutions For Transportation

In today's transportation industry, it is critical for businesses to move people and goods from one location to another as quickly and efficiently as possible. To gain and maintain a competitive advantage, businesses need to streamline and optimize their business operations. This means that businesses need reliable, 24 x 7 x 365 connectivity to monitor and manage vehicles, enable productivity, and provide a great customer experience for passengers.

WSC's Connected Vehicle Solutions provide near real-time visibility into vehicle and asset location, condition and performance enabling businesses to:

- ✓ Reduce maintenance and service costs using real-time diagnostics.
- ✓ Deliver location-based vehicle occupant services and safety information
- ✓ Analyze and act on that information quickly and intelligently.

WSC has teamed up with industry leaders to offer comprehensive solutions for Connected Vehicles. Our solutions include ruggedized Sierra Wireless XYZ 4G LTE router, service on the nation's largest, most reliable 4G LTE network, Enterprise Class remote monitoring and management and ongoing technical support - all from a single source. We also offer Fully Managed Solutions for a fixed monthly fee.
