

Rugged and Reliable Mobile Broadband Solutions For Enterprises On The Move!

In today's transportation industry, it is critical for businesses to move people and goods from one location to another as efficiently as possible. To gain real competitive advantage, you need to optimize your operations by:

- ✓ Increasing visibility into your fleet and logistics operations.
- ✓ Controlling costs through automated processes.
- ✓ Improving visibility into location and condition of assets.
- ✓ Sharing information between your corporate infrastructure and your remote assets

WSC's Connected Vehicle Solutions provide near real-time visibility into vehicle and asset location, condition and performance enabling businesses to:

- ✓ Reduce maintenance and service costs using real-time diagnostics.
- ✓ Deliver location-based vehicle occupant services and safety information
- ✓ Analyze and act on that information quickly and intelligently.

WSC has teamed up with industry leaders to offer comprehensive solutions for Connected Vehicles. Our solutions include ruggedized Cradlepoint COR IBR1150 router, service on the nation's largest, most reliable 4G LTE network, Enterprise Class remote monitoring and management, and ongoing technical support - all from a single source. We also offer Fully Managed Solutions for a fixed monthly fee.
