

Reliable Network Connectivity for *Restaurants and Retail*

Your business never stops running and neither should your network.

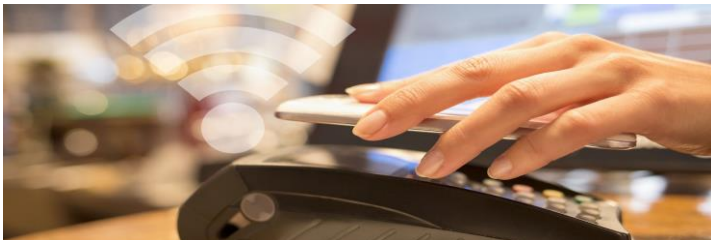

Do you have a backup plan?

Wireless Failover protects your business against costly network disruptions due to man-made or natural disasters.

It's not a matter of *if* a business will lose connectivity, it's about what you do *when* it happens. **For restaurants and retail operations, loss of network connectivity means online orders can't be placed and credit card transactions can't be processed. Is this a risk you can afford to take?**

Benefits of our white glove **Solutions-as-a-Service**:

- ✓ Reliable, affordable connectivity with up to 99.999% uptime
- ✓ Fully managed, fully supported, turn key solutions
- ✓ Service on the best available network (ATT or VZW)
- ✓ Speeds up to 50Mbps with LTE Advanced
- ✓ Seamless connectivity, no user intervention is required
- ✓ If an outage occurs point-of-sale, on-line orders, and other mission critical services continue business as usual
