The MACH Networks Service Provider Program

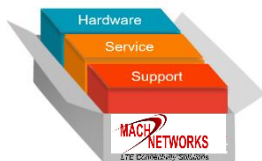

Fully Managed LTE Solutions for Wireless Failover and SD-WAN Connectivity

The MACH Networks Service Provider Program makes it easy to add 4G LTE solutions to your product portfolio and quickly start providing customers with reliable, resilient and cost-effective solutions for Primary, Backup and IoT connectivity. The Program is designed for partners who want to white label LTE wireless failover and SD-WAN solutions as their own, grow their customer base, and pave the way for next generation of 5G technology. We stock the routers, manage the inventory, activate, configure and test devices prior to shipping, remotely monitor and manage the routers, and handle all the ongoing technical support. *MACH does the heavy lifting so you can stay focused on your core business.*

Why MACH Networks?

Our goal is to make it simple, seamless and profitable for Service Providers to add LTE solutions to their product portfolio. Some of the largest landline service providers in the nation trust MACH Networks to fulfill, manage and support their LTE solutions because we make it easy and cost-effective for them to offer reliable and resilient LTE connectivity solutions to their customers. Benefits of working with MACH include:

Fully Managed Solutions

We handle hardware fulfillment, data plans, remote management, and ongoing support

Enterprise Class Connectivity

Service on the best available network for each customer location

Enterprise Class 4G LTE Devices

Best-in-Class routers and modems from industry leaders

Enterprise Class Support

Proactive remote monitoring, management, and technical support results in fewer truck rolls

Plug-n-Play Solutions

Devices are activated, configured, & tested prior to shipping

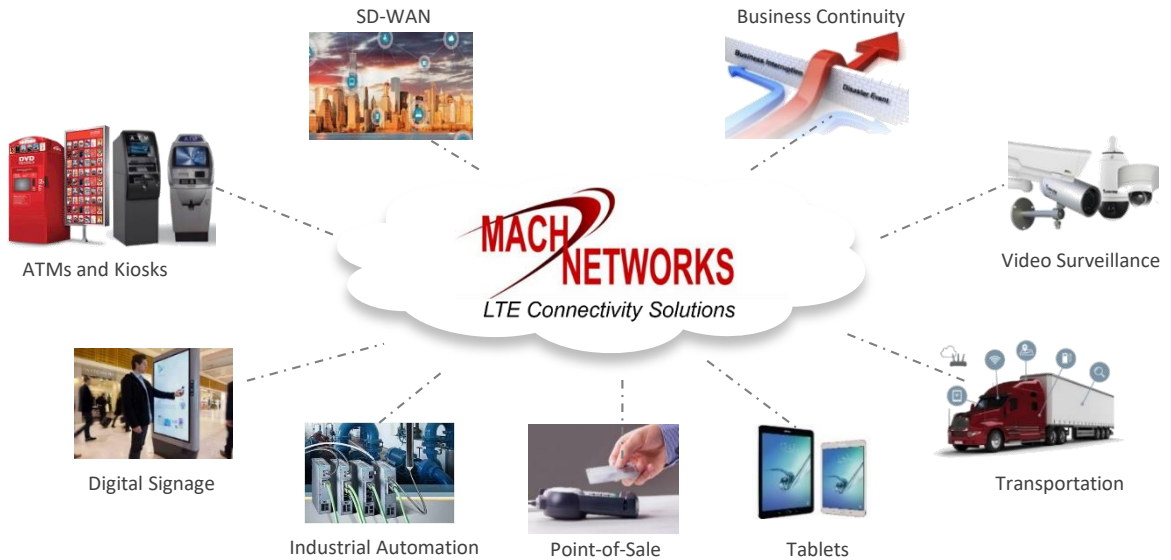

No CapEx Required!

Solutions-as-a-Service

Comprehensive, fully managed solutions for a fixed monthly fee

Enterprise Class Applications Require Enterprise Class Solutions

We offer fully managed LTE solutions for primary connectivity (SD-WAN/Branch Offices), Backup Connectivity (Wireless Failover), and a wide range of connectivity solutions for the Internet of Things. Target customers are SMBs and large enterprises needing primary or backup connectivity for branch offices, retail, transportation, quick serve restaurants, financial services and more. Our solutions can be deployed in days versus weeks, and deliver speeds of over 50Mbps offering a viable alternative to traditional landline services.

Enterprise Class Solutions Require Enterprise Class Products, Services & Support

Enterprise class LTE solutions require enterprise class products.

We offer 4G LTE routers and modems from the industry's leading manufacturers, and with our Fully Managed Solutions we extend the manufacturer's warranty to 3 years. Last year MACH Networks Received the *Cradlepoint Emerging Partner of the Year Award*.

Enterprise class LTE solutions require enterprise class services.

We offer pooled data plans from 5MB to 120GB on the fastest, most reliable 4G LTE networks across the U.S. and Canada. We even conduct a multi-carrier coverage analysis to ensure we provide service on the best available network for each customer location. Prices are the same regardless of the carrier and we have an option to cross-pool data plans across multiple carrier networks. Need static IPs or Private Network Services? *No problem!* Want unlimited data plans? *Stay tuned!*

Enterprise class LTE solutions require enterprise class support.

We provide Tier 1, 2, and 3 ongoing technical support that results in fewer truck rolls. This includes proactive remote monitoring and management of the routers, usage alarms and alerts, and ongoing technical support. If there is a problem, we solve it. *Period.*

YOUR
TRUSTED
PARTNER

MACH Networks: Trusted Partner, Proven Track Record

MACH Networks provides next generation Fully Managed 4G LTE solutions for Primary connectivity, Backup connectivity, and connectivity for The Internet of Things. Our solutions include service plans on the largest, fastest, most reliable 4G LTE networks across the U.S. and Canada, routers and modems from industry leading manufacturers, and our award winning remote monitoring, management, and ongoing technical support. By combining these together, MACH Networks is able to provide a wide range of connectivity solutions for ATMs & Kiosks, Business Continuity, Digital Signage, Industrial Automation, Software Defined WAN, Rugged/Tablet Computers, Transportation, Video Surveillance and more.

MACH Networks currently provides SD-WAN and Wireless Failover solutions for some of the largest service providers in the nation, was recently received CIO Review Magazines Top 20 Solution Provider Award, and last year MACH Networks received Cradlepoint's Emerging Partner of the Year Award.

Let us show you how we can help you easily add LTE connectivity solutions to your product portfolio and quickly enable you to earn your unfair share of the business in the fastest growing segment in the telecommunications industry!

"MACH Networks made it easy for us to add a comprehensive, fully managed 4G LTE Business Continuity solution to our MPLS product portfolio."

Daniel Toomey, Director of Managed Services, XO Communications
